

# Secure Back Office Applications

Canadian Owned and Operated

## Secure Application Access

We provide a secure and optimized environment for hosting your organization's proprietary applications, enabling you to maintain control and enhance performance. Scale your application resources up or down as required, ensuring that your technology investments align with your changing needs.

- Finance and Accounting Systems
- Insurance Business Systems
- CRM and ERP (Cloud and Local)
- Data Exchange, File Send & Receive

## Cloud Desktops

In today's ever-evolving business landscape, agility is paramount. TruPoint's TruWorkspace, our advanced desktop-as-a-service (DaaS) platform powered by Citrix, is meticulously engineered to empower the modern workforce with unparalleled agility while ensuring steadfast security against a myriad of threats.

- Strong Encryption for Transmission and Access
- Daily Full Backups w/30 Day Retention
- Geographic Disaster Recovery
- Anywhere, Anytime Access
- SSAE and PCI Certified Facilities

## Compliance Management

TruPoint helps clients establish and maintain IT policies and tracks compliance with these policies. This is essential for obtaining cybersecurity certifications and cyber insurance coverage. Generate detailed evidence logs to demonstrate compliance during audits, a crucial component for industries like insurance and finance.
